Policy Violations

Clause 72 — Minimum Liability Cap

Severity: Critical

Description: Violation — The clause does not specify a minimum liability cap of \$1M, which is required by the policy.

Clause 28 — Non-Compete Duration Limit

Severity: Medium

Description: Violation — The contract does not mention any non-compete duration, which may imply a duration exceeding the 2-year limit set by the policy.

Risk Findings

Clause 28 — Termination for Convenience and for Cause

Severity: Medium

Description: Termination for Convenience and for Cause — The ability for Cornell to terminate the agreement without cause with 30 days' notice poses a medium risk to the Consultant, as it may lead to sudden loss of income without sufficient time to adjust.

Clause 31 — Indemnification Clause

Severity: High

Description: Indemnification Clause — The Consultant is required to indemnify Cornell for all claims arising from the Services, which poses a high risk as it could lead to significant financial liability for the Consultant.

Clause 5 — Compensation Cap

Severity: Medium

Description: Compensation Cap — The total amount payable by Cornell is capped, which limits the Consultant's potential earnings but also protects Cornell from excessive claims. This presents a medium risk as it may not cover all potential liabilities.

Anomalies

Clause 10 — One-sided terms

Confidence: High

Description: Consultant relinquishes all claims against Cornell for tax withholdings — This clause places the burden solely on the Consultant to accept any tax withholding without recourse, which is unusual as typically both parties share responsibility for tax compliance.

Clause 28 — Termination for convenience

Confidence: Medium

Description: Cornell can terminate without cause with 30 days' notice — While termination for convenience is common, the unilateral right of one party (Cornell) to terminate without cause can be seen as one-sided, especially if the Consultant has invested significant resources.

Clause 30 — Waiver of rights

Confidence: High

Description: Consultant waives rights to additional compensation upon termination — This clause is unusual as it waives the Consultant's right to claim compensation for work done prior to termination, which is not standard in many agreements.

Clause 15 — Access rights

Confidence: Medium

Description: Cornell has extensive rights to access Consultant's data — The clause grants Cornell broad rights to access and copy data, which may be excessive compared to standard access rights typically granted in similar agreements.

Clause 11 — Confidentiality obligations

Confidence: Medium

Description: Consultant's confidentiality obligations are extensive — The obligations placed on the Consultant regarding confidentiality are quite broad and may not be reciprocated, which is unusual in balanced agreements.

Clause 35 — Insurance requirements

Confidence: Medium

Description: Consultant must carry extensive insurance with Cornell as additional insured — The requirement for the Consultant to carry specific insurance types and include Cornell as an additional insured is common, but the extent of coverage and specific requirements may be more stringent than typical agreements.

Negotiation Recommendations

Clause 15 — risk

Priority: High

Description: This redline limits the tenant's liability to situations where they are at fault, protecting them from being held responsible for claims arising from Cornell's own negligence or misconduct.

Suggested Redline: Consultant shall release, defend, indemnify, and hold harmless Cornell and its trustees, officers, agents, and

employees from all liability, suits, actions, or claims of any character, name, or description including reasonable attorneys' fees, brought on account of any injuries or damage, or loss (real or alleged) received or sustained by any person, persons, or property, arising out of the Services or any other work provided under this Agreement, except to the extent caused by the negligence or willful misconduct of Cornell.

Clause 28 — risk

Priority: Medium

Description: This adjustment provides the Consultant with a more balanced termination right, allowing them to exit the agreement with reasonable notice, which is important for managing business risks.

Suggested Redline: Consultant may terminate this Agreement at any time without cause upon thirty (30) days' written notice to Cornell. Cornell may terminate this Agreement without cause upon sixty (60) days' written notice to Consultant.

Clause 35 — anomaly

Priority: Medium

Description: This redline allows for more flexibility in the event of business changes, such as mergers or acquisitions, while still requiring Cornell's consent for other assignments, which protects their interests.

Suggested Redline: Consultant may not assign, transfer, or delegate any of or all of its rights or obligations under this Agreement without the express prior written permission of Cornell, except that Consultant may assign this Agreement to an affiliate or in connection with a merger or sale of all or substantially all of its assets without such consent.

Clause 16 — risk

Priority: High

Description: This change ensures that the insurance coverage aligns with the tenant's requirement for a minimum liability cap, protecting them from excessive liability exposure.

Suggested Redline: Consultant shall procure and carry insurance to financially support indemnification of Cornell as provided herein, and shall provide certificates of such insurance, upon request. Consultant's liability insurance shall have a minimum coverage limit of \$1,000,000 per occurrence and \$2,000,000 in the aggregate.

Clause 13 — violation

Priority: High

Description: This redline clarifies the conditions under which Cornell Data can be used, ensuring that the tenant's data privacy and security concerns are addressed.

Suggested Redline: Consultant shall not access or use Cornell Data to create aggregated or de-identified data nor use Cornell Data as training data in generative artificial intelligence systems unless expressly authorized in writing by Cornell.
